SUMMARY

Results-driven Backend Software Engineer with nearly 3 years of experience specializing in Financial Services, Payment Processing, and scalable Java applications. Experienced in Microservices Architecture and API Integration for secure fintech systems serving millions of users.

WORK EXPERIENCE

Senior Software Engineer, Vaulsys (Pvt.) Ltd, Pakistan

Jan 2024 — Present

- Architected a PCI-DSS-compliant prepaid card management system using Java, Jersey, Hibernate, and Jetty, improving transaction speed by 25%.
- Incorporated Idemia card services and HSM-based cryptography for secure PIN and transaction processing.
- Contributed to the development and enhancement of one of Pakistan's largest EMI backend systems, serving over 1.8 million users with services including e-wallets and virtual debit cards. Focused on optimizing financial transaction APIs to support rapid user adoption and maintain system reliability, contributing to the platform's recognition among top fintech innovators in the region, including earning spots on Forbes Asia's 100 to Watch list for 2024 and CB Insights' Top 100 Fintech Startups for 2024.
- Implemented integrations with multiple banking partners for ONUS cash withdrawals, reversals, and balance inquiries using ISO 8583 and REST APIs.
- Designed and implemented scalable microservices for a Buy Now, Pay Later (BNPL) platform, streamlining the loan approval workflow and reducing processing time by 30%. Integrated credit scoring, fraud detection, and third-party APIs to ensure faster, secure, and data-driven decision-making.
- Led migration from Oracle to PostgreSQL for BNPL Product, reducing licensing costs by 47% and improving system maintainability.

Software Engineer, Vaulsys (Pvt.) Ltd, Pakistan

Sep 2022 — Dec 2023

- Automated 40% of backend tasks including refund and device handling via Java and Jersey.
- Optimized Oracle DB queries, decreasing settlement downtime by 15%.
- Built real-time monitoring and control admin portals with Java and Vaadin, enabling operations teams to proactively manage system performance and reduce manual intervention by 40%.
- Established Integration with a third-party checkout system for card addition and recurring installment payments, ensuring PCI DSS compliance.

EDUCATION

Universität Siegen, Siegen, Germany - MSc, Computer Science

2025 — Present

DHA Suffa University, Karachi, Pakistan - BSc, Computer Science

2018 — 2022

CERTIFICATIONS

[Introduction to Containers w/ Docker, Kubernetes & OpenShift](#)

May 2025

PROJECTS

Smart Daily Digest Bot – AI-powered news summarization agent, [Link](#)

Jun 2025

- Python, OpenRouter API (Claude Sonnet), SMTP, RSS, PythonAnywhere
- Built an automated bot that fetches daily tech news from RSS feeds and summarizes it using Claude Sonnet 4 via the OpenRouter API.
- Integrated with Gmail SMTP to email AI-generated summaries at 9:00 AM daily.
- Deployed on PythonAnywhere (with optional GitHub Actions for CI/CD or serverless automation).
- Utilized `feedparser`, `schedule`, `dotenv`, and the OpenAI SDK with secure environment variable management.
- Demonstrates skills in API integration, automation, deployment, and prompt engineering.

SKILLS

Backend Development	: Java, Spring Boot, Hibernate, Jersey, Servlet API, Vaadin, Freemarker, Kotlin
Frontend Development	: HTML, CSS, JavaScript (Basic)
DevOps	: Docker, Kubernetes, GitLab CI/CD, Linux (Ubuntu, CentOS), OpenShift
Testing & Build Tools	: Maven, Gradle, JUnit 5, Selenium, Postman
Database Management	: Oracle, PostgreSQL, SQL, NoSQL
Servers	: Jetty, Apache Tomcat
Security & Payments	: ISO 8583 Standard, PCI DSS, HSM, Open Banking

Version Control & Collaboration

Technical Leadership & System Design

: Git, GitHub, Bitbucket, Jira, ClickUp, Slack

: Architecture, Knowledge Sharing, Deliverables, Consideration, Production Systems, JVM, Cloud, AWS, Motivation

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), German (Beginner), Urdu (Native)
- **Strengths:** Fast learner, proactive problem-solver, thrives in Agile environments, Strong cultural adaptability, and effective in diverse, value-driven environments.
